Rapid Hair Loss				
Decrease in beard growth				
New Migraine Headaches				
Decreased desire/libido				
Decreased morning erections				
Decreased ability to perform sexually				
Infrequent or Absent Ejaculations				
No results from E.D. medications				

I understand that if I begin testosterone replacement with any testosterone treatment, including pellets, that I will produce less testosterone from my testicles and if I stop replacement, I may experience a temporary decrease in my testosterone production. Testosterone pellets should be out of your system in 12 months. By beginning treatment, I accept all the risks of therapy stated herein and future risks that might be reported. I understand that higher than normal physiologic levels may be reached to create the necessary hormonal balance.
